- Github-Front end web dev
- Google drive-data analysis
- Canva-graphic designing

PROFILE

I'm an aspiring front-end web developer with a strong focus on HTML and CSS, and I'm currently learning to build modern websites using React with Vite. I don't write JavaScript myself yet but use ChatGPT to generate and understand it. I enjoy designing responsive and clean interfaces, and I'm working on improving my skills through personal projects. My goal is to become a confident front-end developer and work on real-world projects soon, InshaAllah.

WORK EXPERIENCE

Front-end web dev   JAN 2025 – PRESENT
Self-Learning & Personal Practice

- Practicing front-end development by building small websites using HTML, CSS, and React (with Vite).
- Learning how to structure components, create layouts, and make designs responsive.
- Using ChatGPT to help write and understand JavaScript when needed.

Data Analysis (Power Bi, Ms-Excel)   Jan 2025-Present
Self learning & Personal Practice

- Developed small interactive dashboards using Power BI and Excel.
- Worked with sample data to visualize trends and create insights.
- Built user-friendly reports that helped understand data more clearly.

Graphic Designing (Canva, Inkscape)   Jan-2024
Self learning & Personal practice

- Created digital designs and marketing materials using Canva and Inkscape.
- Designed logos, social media posts, and simple branding assets.
- Earned small income by providing graphic design services.
